AWT IMPACT REPORT
2022 Year-in-Review

January 1 - December 31, 2022

Following provides a preview summary of donations received from AWT members/businesses through December 12, 2022.

Please note: Numbers may not include donations made on the PWW general fundraising page (rather than AWT-specific pages) by donors who do not self-identify as AWT.

- AWT/PWW General Fundraising Page: $29,724
    - AWT Monthly Donors: $5,030 (included in general)
- AWT donations supporting PWW's World Water Day Virtual Auction: $670
- 2022 AWT Convention Fundraiser: $7,856
- AWT #GivingTuesday Fundraiser: $15,000
- AWT-Apollo Inspired Giving Fundraiser:
    - Launched December 10 with goal to raise $100,000; $50,000 from AWT members + $50,000 match from Apollo/Bly Family Foundation
    - AWT-Apollo Inspired Giving Funds: $20,298 (received as of 12/31/22)
    - Link to fundraiser: https://impact.purewaterfortheworld.org/awtdoubleimpact
- AWT Member funded special project: $21,619
- Number of AWT Donors: 72 individuals, representing 40 AWT-affiliated organizations.
- In-Kind Donation:
    - AWT shared OneCause subscription again this year, enabling PWW to host World Water Day online fundraiser
- **Total Monetary Funds Received (to date) in 2022: $95,167**

AWT FUNDRAISING IMPACT SUMMARY

2022 Convention and Giving Tuesday Impact Update:

AWT & PWW joined forces to provide a comprehensive safe water, sanitation and hygiene education (WASH) solution to schoolchildren in Honduras. The project is fully-funded, thanks to AWT members and partners, including Giving Tuesday matching gifts from Sanipur US and US Micro Solutions. Implementation of the school WASH program is expected to begin in Spring 2023.

Project Details:

- 171 students and 10 teachers at the Francisco Morazán School in San Juan el Rancho, Honduras will benefit from sustainable access to clean water, safe sanitation, and healthy hygiene at school. This long-term WASH solution will provide the essential tools and educational foundation to support current students and teachers as well as future generations.
- School WASH solution includes: (*click here for full details)
    - Reliable Water Access: 5,000L water storage tank (to connect with community water system) to provide sufficient and reliable water access; 3 ceramic filters with safe water storage buckets.
    - Safe Bathroom & Handwashing Facilities: 3 bathrooms for girls, supporting effective menstrual hygiene management; 2 bathrooms for boys; 1 accessible bathroom; 2 bathrooms for teachers; 8 handwashing stations with touch-free taps, operated by foot pedals.

    - Sustainable Septic: Renovation of existing septic system.
    - WASH Supplies: Cleaning materials, paper towels, soap dispensers, soap, mirrors, sanitary pads with dispensers.
    - WASH Training: Teacher training to integrate WASH concepts/practices into school curriculum; student and teacher hygiene training, including menstrual hygiene management.; training of local water boards about school WASH system and support.
    - WASH Committees: Establishment of student, parent, teacher WASH committees.
    - Monitoring & Evaluation: Three years post-implementation to support WASH program efficacy.
    - THE RESULT. Fully-realized WASH solution serving all current and future students and teachers.

2021 Convention Impact: 2022 Report Update

With funds raised at the convention, the PWW team in Haiti has been able to support the implementation of critical safe water tools and the provision of essential sanitation and hygiene education among families and in schools located in the underserved region of Limonade, Haiti.

The Limonade region has no established water or sanitation infrastructure; community members are not proficient in safe hygiene practices. PWW is collaborating with local government, community leaders, and community groups to change this reality.

Thanks to funding from AWT, this year, the PWW team in Haiti was able to establish a critical community-based program, the Community Education Program (CEP) in Limonade. This community-driven program involves PWW training and supporting local community leaders (referred to as Lead Community Agents – *pictured right*) to serve as WASH paraprofessionals. Trained LCAs deliver WASH messages and reinforce healthy practices among members of their communities in order to advance the ownership, efficacy and sustainability of the safe water, sanitation and hygiene (WASH) programs.

As a result of the CEP launch this year, trained LCAs have:

- Delivered three (3) training sessions, each of which contain multiple workshops.
  - Reached 177 individuals in Pistère, a community in Limonade.
  - Initiated training among 196 individuals who live in Deréal and Campeche, communities located in Limonade.
- Collaborated with PWW Haiti team to host community education events in celebration of Global Handwashing Day and World Toilet Day.

PWW was also able to host a deworming campaign in Pistère, reaching 1,200 residents. The campaign included the distribution of anti-parasitic medicine, administered by PWW's partner Soaring Unlimited Medical Clinic, to the 1,200 individuals to remove existing parasites, worms, and intestinal pathogens that may be residing in their bodies as a result of drinking and using contaminated water. This process supports the elimination of existing intestinal illnesses and enables the individuals to have a clean system, which they are empowered to protect thanks to reliable access to safe water and the acquired knowledge of safe and healthy hygiene practices.

**Pictured: Junior Seraphin (far right), PWW WASH Training Coordinator, with LCAs who helped promote and manage the campaign.*

Programs implemented in 2022 have empowered families and students with the knowledge to protect their primary water source(s) and keep their filtered water safe from re-contamination. They have learned how to improve their sanitation management and safely dispose of waste. They have also learned critical hygiene practices, including personal hygiene, handwashing and menstrual hygiene management, to protect their health and the health of their community.

Support from AWT and its members make this impactful work possible, enabling families and school communities to gain critical, reliable access to safe water and sanitation tools and essential hygiene knowledge, creating a foundation for vastly improved health and opening doors to future opportunities.

2021 Giving Tuesday Impact:

Last Giving Tuesday, AWT sponsored a fundraising campaign to raise money for one of PWW's most valuable tools…a durable, reliable truck that can withstand the extreme, unimproved roads, creeks and riverbeds that PWW teams in Honduras must travel on, and through, to reach the most rural communities.

AWT members, Sanipur US and Precision Chemical, offered to match donor funds in order to help AWT members reach the $30,000 goal. Apollo Technology Group and the Bly Family Charitable Foundation provided an additional challenge match, releasing a match gift of $30,000 once AWT members reached the initial $30,000 goal. AWT members from across the country came together and *exceeded* the goal!

The result of this impactful fundraising day enabled PWW to purchase a much-needed truck in Honduras, allowing the team to reach more families with life-changing safe water programs this year. We are extremely grateful for this significant gift.

What's more…PWW was able to purchase motorcycles for the team in Haiti. Motorcycles in Haiti have always been a very efficient form of transportation, but this year they played a critical role for the PWW team, as the country has faced a variety of unprecedented challenges, including extremely high fuel costs combined with very low fuel supply, along with road blockages that prevent larger vehicles from getting around.

The three motorcycles have, *quite literally*, kept the PWW team in Haiti moving forward this year, enabling them to continue delivering safe water and hygiene education programs to those living in underserved communities, located in the northern region of Limonade, where there is no infrastructure for water or sanitation.

Funds donated by AWT members are a long-term investment that changes lives, not just for days or years, but for generations to come. Thank you so much!
