

2018 GOAL REVIEW

The following chart identifies key goals for 2018 and highlights the progress made:

Goal	Results
Expand upon PWW's mission in Haiti by partnering with local, community-based nonprofits to reach new regions and by offering additional educational programs.	<ul style="list-style-type: none"> • Expand Water, Sanitation and Hygiene (WASH) program in northern Haiti, in partnership with the local organization FECHAN (<i>Fédération des Chambres d'Argiculteurs du Nord</i>). <ul style="list-style-type: none"> ○ FECHAN staff has been attending PWW trainings since 2012 and has installed more than 5,000 biosand filters in the Limonade area. ○ Goal to continue supporting and supervising and help FECHAN build capacity as a local WASH implementation organization. ○ For the pilot project, PWW is training and supervising FECHAN staff on sand production, family and community agent training, and filter installations. ○ <i>"This represents a transition opportunity for PWW's implementation model in which we can support local organizations; stepping back from direct implementation and leaving more skills and knowledge in the communities we serve."</i> - Marion Nonglaton, PWW Haiti Country Director • Launched menstrual hygiene management (MHM) education program in Haiti schools. <i>"Access to MHM products and knowledge in rural communities is almost impossible, making girls' lives more difficult when going to school and performing daily activities, and impacting their overall health, education, and future."</i> - Nonglaton • Participated in inaugural WASH assessment study in Haiti healthcare facilities. WASH in healthcare facilities is critical for maternal and child health, for quality healthcare services, and for preventing the spread of diseases. This is an area for future growth.
Invest time and energy internally, with the goal of improving the efficiency and effectiveness of our global team	<ul style="list-style-type: none"> • Focused on PWW team efficiency. <ul style="list-style-type: none"> ○ Held more in-person staff meetings. ○ Collaborated on effective team communication styles and formats. ○ Established collective goals for improved efficiency. • Transitioned to new database, enabling greater efficiencies, and improved donor communications and reporting.
Further expand WASH training programs to reach more countries in Central America.	<ul style="list-style-type: none"> • WASH workshops help PWW receive recognition and gain reach in different countries. <ul style="list-style-type: none"> ○ Guatemala Rotary Club hired PWW to train and coach 12 facilitators, who have a teaching background. Today, through Rotary, these facilitators are now training teachers in Guatemala and El Salvador. ○ Honduras WASH Training Teams have also worked with clients in Nicaragua and other parts of Guatemala. • PWW partner CAWST (Centre for Affordable Water and Sanitation Technology), who lead PWW in establishing the PWW-Honduras WET (Water Expertise Training) Center, has recommended PWW to several Central American clients. The "Integration of WASH Workshop for Teachers" is currently one of a kind, with PWW being the only organization teaching this impactful course.
Grow the volunteer Community Agent program in Honduras to include additional training and expand to offer potential income opportunities.	<ul style="list-style-type: none"> • PWW Honduras team has identified "star" Community Agents, from the 1600 who have been trained, to receive additional training and become <i>Community Health Promoters</i>. Once they have completed several practices, they will be able to perform WASH supervisions in their community. • After completing this initial step to become Community Health Promoters, there is additional opportunity. <i>"We are looking into the possibility of piloting a 'Community Health Club' in 2019, which will incorporate a deeper level of training that may result in several potential income opportunities."</i> - Maria Inestroza, Country Director Stay tuned!
