

Pure Water
FOR THE WORLD

2019 Annual Report

Pure Water for the World's mission is to improve lives by empowering people with access to life's most basic necessities... safe water and sanitation.

We do this by partnering with underserved communities, in Central America and the Caribbean, providing the tools and education to establish sustainable safe water, hygiene, and sanitation programs.

Letter from Executive Director

Dear Friends of PWW,

THANK YOU! PWW's successes, and the thousands of lives that have been changed forever, are only made possible because of the generous commitment of our supporters, including you.

Over the years, PWW has experienced a great deal of change, evolving our programs to improve their impact, while continuing to be good stewards of our donors' investments and remaining true to our mission.

Twenty years ago, we began installing water filters in family homes and schools. We are still installing water filters. Today, however, those filters are part of a comprehensive solution that incorporates water filters and latrines, as well as essential hygiene education, including menstrual hygiene management. Thorough follow-up and monitoring processes are integrated into today's program to ensure correct, consistent, and long-term use of the tools and practices.

Our WASH Training and Consulting Teams are busier than ever, empowering organizations to effectively implement safe water programs. Teams in both countries are working closely with local, regional, and national governments to develop, support, and implement widespread WASH (water, sanitation and hygiene) initiatives.

This is my final message to you as PWW's Executive Director. This year I will enter into the next phase of my life, *retirement*. It has been an unbelievable 17 years, and I am honored to have led this organization. But I have not done this alone. I have had the privilege of collaborating with so many deeply dedicated people...our staff, the Board, partners, volunteers, and donors. It is a terrific organization, full of even greater potential. Our commitment to you is that PWW will continue its steadfast course, staying focused on our mission, with unobstructed passion, perseverance, and donor stewardship.

I believe there will come a day when future generations will not know the pain, suffering and struggle of waterborne illnesses. Your continued involvement and partnership with PWW will help make that a reality. It's been an amazing ride, and you have been a huge part of that. *I thank you so very much.*

With gratitude and well wishes,
Carolyn Crowley Meub
Executive Director

Fiscal Year 2019

July 1, 2018 – June 30, 2019

Our Impact in 2019 – 6,000+ Beneficiaries

“Leogane has many water issues. My community uses a damaged water source that is unprotected. Animals and people use this water source together, and it is very difficult to access, as it is far away in the mountains. We are grateful for PWW.” — Rome Deluis, Leogane, Haiti

PWW launched a new WASH project in Leogane, reaching 200 families (1,260 people) and four large community schools (600+ students).

“As a mother, I love this filter for all the benefits it brings to my family. I cannot imagine how life would be without it!” — Consuelo De Martinez, Honduras

Consuelo’s family realizes the tremendous benefits of using clean water and safe hygiene. In addition to drinking it, rather than the contaminated ravine water, they use filtered water for all of their household tasks and for their personal hygiene practices. The family’s health has improved dramatically, and they are all grateful for that!

Our Impact in 2019 – Tools

1,206 Biosand Water Filters

218 Single-Family Latrines

28 School Hand-Washing Stations

54 School Latrines

15km PVC Piping for Schools

6 Rainwater Harvesting Systems

Our Impact in 2019 – Education & Follow Up

- 149** Community-Based Hygiene Education Workshops
- 366** Community Agents Trained
- 67** Teachers trained on safe, healthy hygiene practices
- 448** Trainees in WASH Education Training Programs
- 917** Monitoring & Evaluation Visits

Water Quality Testing

516 Tests were conducted for a wide-variety of clients in Haiti, including other NGOs, governmental organizations and private businesses in our Water Quality Testing Lab.

The Honduras team built out their water lab this year, increasing their ability to test water and enhance WASH programs.

In communities served, PWW teams provide testing for source water, storage water, and filtered water to ensure that tools are working efficiently and effectively and communities are experiencing lasting impact.

WASH Training & Consulting Services

PWW trained 89 teachers in the remote region of La Mosquitía, 13 of whom learned how to teach WASH practices. Only six months after receiving this training, these teachers had already trained over 5,050 people!

Expanding Our Collective Impact.

With a strong commitment to safe water, sanitation and hygiene for all, *and knowing we can't accomplish this alone*, PWW delivers a comprehensive variety of **WASH (WAter, Sanitation & Hygiene) Training programs** to individuals and groups representing a variety of organizations, including other NGOs, government agencies, private businesses, and teachers.

This year, we conducted **23** workshops, covering **10** WASH topics, and providing critical WASH skills to **448** individuals.

Volunteers Deliver Lasting Health, Hope & Opportunity

This year, 21 volunteers joined our in-country team, sharing their time, talent, and passion to make a lasting difference.

They installed biosand water filters in family homes, dug trenches for PVC piping, built latrines and handwashing stations at schools, sifted sand, administered anti-parasite medications, got to know PWW local teams, and interacted with local children and families at their homes and schools.

These trips are transformational...for the volunteers and the children, families, and communities served. We invite you to be a part of delivering lasting change.

“This week in Honduras has been an extraordinary trip, and a beautiful gift of perspective. It’s been a week of experiencing intense poverty, incredible joy, unique culture, and a powerful God who cracked our hearts wide open so that we could love and serve in abundance. Definitely, humanity at work.

So many things we take for granted – plumbing, electrical, sanitation, clean water, FREE clean water with ice even at restaurants, television, vehicle transportation, grocery/convenience stores, sidewalks and paved roads... and on and on.... The remote communities we worked in outside of Trojes have NONE of these things. It took us 2 hours each

way in the back of trucks to reach these homes and even then, some hiking was involved to get to the homes to install the water filters but, these filters will save lives.” — Emily Shaw Osborne, Volunteer

A photograph of two young girls standing outdoors on a paved surface. The girl on the left is wearing a teal short-sleeved top with a colorful geometric pattern and a grey and white checkered skirt. The girl on the right is wearing a white short-sleeved top with a colorful geometric pattern and a red and white striped skirt. Both girls have their hands raised in front of them, palms facing forward. In the background, there is a concrete staircase with a metal railing and a green building. A white rectangular box with a green border is superimposed over the middle of the image, containing the text "Take Action".

Take Action
